

Scrum Quality Management: Acceptance Criteria

Assignment:

Create acceptance criteria for each of the Ten (10) user stories of Jul Clinic identified in your Scrum Estimation Techniques assignment.

TEN User stories for the Jul Clinic and the acceptance criteria for each story (use the point form style as in the following examples)

What is Acceptance Criteria?

“Quality is defined as the ability of the completed product or deliverables to meet the Acceptance Criteria and achieve the business value expected by the customer.”

“Each User Story will have associated User Story Acceptance Criteria (also referred to as “Acceptance Criteria”), which are the objective components by which a User Story’s functionality is judged.”

User Story:

“As an online grocery shopper, I should be able to save and view my draft order from any of my devices so that I can complete the order process at my convenience.”

Acceptance Criteria:

- Every in-progress order is saved every five seconds to the logged-in user account as a draft order
- New draft orders show up as notifications on any devices the user logs in
